

Tinyel's Super easy crochet hackysack pattern

Pattern created November 2nd 2023 for history nerds in the future

Step 1: Chain 3. Double crochet into the first chain.

Step 2: Double crochet 6-10 times into the first chain to form a circle. Slip stitch to close.

Step 3: Chain 2, double crochet into the first stitch, then again into each following stitch. Slip stitch to close. Repeat this step for the next two rows.

Step 4: Chain 2. Double crochet into the first stitch, double crochet two-together the rest of the way around. Slip stitch to close.

Step 5: Fill. Plastic beads can be bought, but cannalily seeds, beans, or other hard seeds are better for the environment.

You can also use fluff if you want it to just be a soft ball. Cotton or milkweed fluff is better for the environment than polyfill, but use what's available to you.

Step 6: Cut a tail on the yarn, and pull it through the last loop. Use your hook or a needle to pull the tail through 1 loop of each stitch, going towards the center, either the top or bottom loop. Pull to close. Form a slip knot. Hide the tail by using your hook or needle to pull it into the ball.

You're done! :) Share and enjoy!
